ULTRASEPTIN®

Granulate for the manual cleaning and disinfection of medical instruments on the basis of peracetic acid. Wide microbiological activity as well as high material compatibility makes it suitable for using on thermolabile equipment such as flexible endoscopes. VAH/DGHM listed.

Product information: ULTRASEPTIN® is a water-soluble granulate for cleaning and disinfection of medical and surgical instruments and equipment on the basis of peracetic acid. ULTRASEPTIN® has a wide microbiological activity, is odourless and removes bloody and oily residues reliably. With its high material compatibility ULTRASEPTIN® is also applicable for the manual cleaning and disinfection of thermostable and thermolabile medical instruments incl. flexible endoscopes as well as for ultrasound baths. ULTRASEPTIN® is successfully tested on Karl STORZ and OLYMPUS endoscopes. Available as AKTIV with enzymatic additives for the cold sterilization and CLASSIC without enzymatic additives. VAH/DGHM listed.

Microbiological activity: With high organic load: bactericidal, mycobactericidal (incl. M.terrae, M.avium), fungicidal, virucidal (incl. HBV, HIV, HCV, Adeno, Papova, Vaccinia, Polio), and sporicidal.

Packing unit:

- 20g bag
- 1000g can
- 5kg bucket
